bharatgoswami2112@gmail.com Mumbai, India

PROFESSIONAL SUMMARY:

Dynamic Full Stack Web Developer skilled in the MERN stack, with expertise in JavaScript, React, and MongoDB. Adept at problem-solving and effective communication. Proficient in utilizing Generative AI, and quick to learn new tech stacks to enhance development processes.

EDUCATION:

Masai School Full Stack Development Bangalore	March 2023 - March 2024
Bachelor of Science (B.Sc) in Information Technology Karmaveer Bhaurao Patil College Mumbai, Maharashtra	July 2018 - July 21

TECHNICAL SKILLS:

MongoDB | JavaScript | React | Express.js | Node.js | Git | Redux | Responsive Web Design | Angular | Ionic | Electron | Docker

SOFT SKILLS:

Problem Solving | Effective Communication | Adaptability

WORK EXPERIENCE:

Telesoft Software Developer	March 2024-present
<ul style="list-style-type: none">Designed and implemented dynamic web applications using the MERN stack, ensuring seamless integration between front-end and back-end components and delivering scalable solutions.Collaborated with cross-functional teams to ensure efficient communication and interoperability between software components, enhancing the overall development process.Managed and optimized MongoDB databases to maintain high performance and data integrity, crucial for developing robust web applications.	
Word Publishing Software Quality Engineer	November 2021 - August 23
<ul style="list-style-type: none">Led the testing and quality assurance initiatives for projects, ensuring high reliability and performance.Utilized QTP for automated testing and JIRA for issue tracking and resolution, streamlining the testing process.Collaborated with cross-functional teams to identify and resolve software defects, enhancing overall product quality.	

PROJECTS:

Clothify

- Developed a full-stack e-commerce application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed and developed responsive and user-friendly UI to enhance the shopping experience.
- Optimized database queries and implemented caching mechanisms to improve application performance.
- Created and maintained efficient server-side APIs using Node.js and Express.js for seamless data exchange.
- Implemented Redux for state management, ensuring smooth and scalable application operations.

Tech Stack:

JavaScript | Redux | React | Node.js | Git | MongoDB | RESTful APIs | Responsive Web Design | Express.js

CERTIFICATIONS:

WordPress and Drupal and website development - Sutra Infotech
Requirements Gathering for Secure Software Development - Coursera
